

**LINING SOLUTION  
FOR ANY NEED**

---

# ABOUT US

- ◊ **Deogiri Stone Product Pvt. Ltd.** was incorporated under company act 1956 on 5 April 2007 in Aurangabad Maharashtra With intension to provide excellent quality aggregate and sand for industrial, commercial, Government & Residential projects.
- ◊ Our activity is to manufacture stone aggregates of different sizes and Artificial Sand (P - Sand and M - Sand).
- ◊ We have located our state of art plant facility and mine at Bidkin Aurangabad.
- ◊ Technically we are competent to supply all type of aggregates with excellent quality of graded aggregates produced with advanced technology for the industry.

# QUALITY POLICY

- ◊ We have been delicately striving to sustain our reputation in the industry through the system for conducting stringent quality analyzing and in house testing and checking.
- ◊ We at our company are committed to: Meet customer requirement & satisfaction by providing service on time, every time.
- ◊ Manufacture high quality products that fir to-use and durable.
- ◊ Achieve & Maintain high standards of quality management system by employee motivation, participation improvement in the system.

# VISION & MISSION

- ◊ We have been delicately striving to sustain our reputation in the industry through the system for conducting stringent quality analyzing and in house testing and checking.
- ◊ We at our company are committed to : Meet customer requirement & satisfaction by providing service on time, every time.
- ◊ Manufacture high quality products that fir to-use and durable.
- ◊ Achieve & Maintain high standards of quality management system by employee motivation, participation improvement in the system.

# PRODUCT INTRODUCTION & ITS SPECIFICATION

Since, there is shortage of good quality of aggregates and sand also, to avoid using natural sand and to avoid depletion of river bed we equivalently manufactures P Sand and M Sand from our sand washing Unit (UK Patent Technology).

**Below are some of the Coarse Aggregates with their Applications in Industrial Sectors.**

**06 MM**

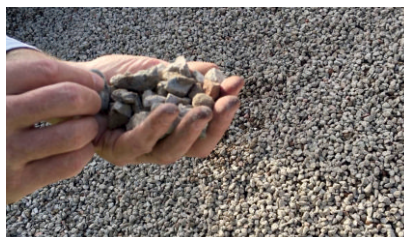

Used for flooring purpose

**10 MM**

Used in RMC, Pavement

**20 MM**

Used in RCC Structure

**28 MM**

For preparing Concrete

**40 MM**

In construction of Road

**60 MM**

Used for flooring purpose

**GSB**

Used in RMC, Pavement

**SOLING**

For Foundation purpose

**Below are some of the Fine Aggregates with their Applications in Industrial Sectors.**

**CRUSHED SAND**

Used in Constructing Slab

**P SAND**

Used in Plastering

**M SAND**

Used for Concrete Product

These different sizes of Qualitative Aggregate is Highly Required and demanded in the construction field.

# PRODUCTION FACILITY

Our Plant is 250 TPH fully automated 4 stage crusher with sand washing unit (Weir minerals UK's Patent Technology). We have 10 fleet with 3 Loaders Work 24 x 7.

## WHY US?

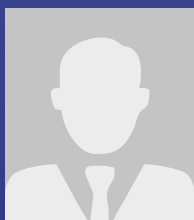

- Over the years in the industry we have earned enviable reputation among our clients for the quality products with latest technologically improved machinery for high quality aggregates
- Timely delivery
- In- house testing facility and frequently material checking
- 24/7 technical Support facility
- Large production capacity
- Experienced and skilled staff
- Latest technology machinery and infrastructure
- Supplied 15 lakhs + cu argg

## APPLICATION AND USES

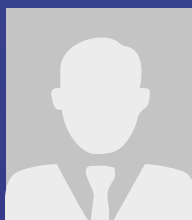

- For High Quality Industrial Floor / Tremix Concrete
- Irrigation and Big Infra Project Work
- Road construction
- Building foundation work
- Civil engineering work
- Flooring
- Preparing concrete

## OUR DIRECTORS & TECHNICAL KEY PERSON ADVISORS

To effectively run our company and ensure our progress at every stage we have directorial team namely.

# MASTER SAND (M SAND)

Master Sand (M-Sand) is Artificial Sand produced from crushing hard stones into small sand sized angular shaped particles, washed and finely graded to be used as construction aggregate.

## Advantages :

- ◊ Higher flexural strength better abrasion resistance
- ◊ Higher unit weight, and lower permeability
- ◊ Higher Fineness Modules Index compared to the natural river sand
- ◊ It gives good work ability for concrete

# PLASTER SAND (P SAND)

P Sand is Plastering Manufactured sand also known crushed sand or manufactured fine aggregate. It is a substitute for river sand for construction work. It is manufactured by crushing rocks, quarry stone or larger aggregate pieces into sand size particle in a factory or query.

## Advantages :

- ◊ Higher flexural strength
- ◊ Better abrasion resistance
- ◊ Higher unit weight
- ◊ Lower permeability
